10 YEAR LIMITED WARRANTY FOR DECORATIVE RAILING & POSTS

FENCE FOUNDRY

Fence Foundry Aluminium Railings and Gates are manufactured from high quality aluminium alloy with a sand grain effect powder coating.

Fence Foundry Steel Railings and Gates are manufactured from steel and are galvanised. Some railings, where stated are powder coated.

Fence Foundry warrants its railings and gates to be free from manufacturing defects in materials and workmanship to the original consumer/purchaser for a limited 10-year period under normal use, conditions, installation and following maintenance/cleaning instructions.
The purchaser must do quarterly maintenance and show a record of that maintenance.

The powder coating finish on all Fence Foundry Railings is guaranteed for 10 years against cracking, peeling, chipping or crazing, under normal use, conditions, installation and following maintenance/cleaning instructions.

The warranty does not cover the condition of the railing caused by or resulting from weathering, scratching, discoloration, tarnishing or performance caused by exposure to corrosive elements or atmospheric contaminates such as salt spray, salt air, chemicals, and pollution; vandalism; surface oxidation; settlement, structural shrinkage, distortions or expansions of the property or structures on property on which the railing is installed, affixed or otherwise placed; acts of God or other causes beyond the control of Fence Foundry.

Additionally, discoloration of the railing shall not be considered a defect covered by this Limited Warranty.

Should the railing fail in accordance with any of the above conditions;
the manufacturer, guarantees replacement or renewal of the defective parts only.

Notice of such failure shall be sent to the manufacturer in writing, together with proof of purchase and shall specify the nature of the defect and when it was first observed.

Should the product be improperly installed Fence Foundry shall not be responsible for guaranteed performance or appearance of the material. Neither does this guarantee apply where failure or damage is due to improper use or application, abuse, or misuse, or acts of God.

Fence Foundry reserves the right to request the return of the product, transportation charges prepaid, for the purpose of inspecting the material to determine the validity of a claim.

Upon validation of a claim by Fence Foundry, replacement will be made from the factory, only for material which shall be returned to the factory in Co. Meath transportation charges prepaid. Materials must not be returned to the factory without prior authorization from Fence Foundry.
The above constitutes the complete warranty by the manufacturer and no other agreement, written or implied, is valid.
This warranty cannot be transferred.

CARE & MAINTENANCE OF DECORATIVE RAILING & POSTS

FENCE FOUNDRY

To maintain your Fence Foundry Railings, clean with warm soapy water and soft cloth or sponge. Rinse thoroughly after washing. Any use of abrasive cleaners or materials will render warranty invalid.
Make sure any materials such as plaster; concrete or paint splashes are removed immediately before they dry. Failure to do so can cause damage to the powder coating.

Railings should be cleaned in quarterly intervals at a minimum. In situations where there is more traffic, or potentially harmful atmospheric substances, we suggest monthly intervals.
Scratches or scrapes should be resealed with a suitable metal paint.

WARNING: Do not use strong solvents such as thinners, or solutions containing chlorinated hydrocarbons, esters, or ketones. Abrasive cleaners or cutting compounds should not be used.

ALUMINIUM RAILINGS WARNING: Important information and a T&C of warranty for Fence Foundry Aluminium Railings.

In fresh concrete, aluminium reacts principally with alkali hydroxides from cement. The pH of fresh mortar/cement ranges from 12 to 13. Aluminium in contact with plain concrete can corrode, and the situation is worse if the concrete contains calcium chloride as an admixture or if the aluminium is in contact with a dissimilar metal. To protect your fence post and warranty ensure all aluminium in contact with concrete must have a high quality waterproof barrier fixed between the aluminium post and the concrete mix, this along with proper material selection and correct construction practices will protect your warranty
